LARGE CONTAINERS / LOGISTICS AND HANDLING

CARGO FOLD 700 - FOLDING DOOR

56/IIP - IPPR 936

Cargo Fold 700 folding door, the first cargopallet with collapsible walls and available on wheels, is even more flexible and ready to meet transport and storage requirements. The special white polyamide wheels, fastened to the base of the Cargo Fold, include special galvanized steel cross bars to ensure hold and stability of the load; moreover they allow use with heavy duty loads up to 600 Kg.

The new Cargo Fold 700 is completely folding. With this system, in case of transport and storage of empty containers, you shall earn 63% in volume: a stack of eight folded Cargo is the same height as three open ones. The stacking of Cargo Fold 700 is assured by 4 cylinder/spherical pins obtained directly from the mold on top of the container that fit into appropriate seats at the bottom of the legs/runners of container. The 35 mm recessed ensure maximum safety and stability of the stacking. Available in HDPE, PP or RPP, both very resilient and sturdy. No metal inserts at all, Cargo Fold is completely recyclable. Feet, hinges and locking mechanism in black colour are immediately visible, and appear very nice with the grey walls and base. The Cargo, completely dismountable, allows the replacement of eventually damaged parts. Every wall can be fitted with label holder for an immediate identification of the content and can be personalized with the company logo.

Max loading capacity: 650 dm³

Max loading capacity: 200 kg with evenly distributed load - in piling: 800 kg.

Colours: Food Contact Grey Ecological Dark Grey Custom Product (for minimum lot)

Material: Inert to acids, hydrocarbons, alkalis and solvents.
